

Send a telex like an e-mail

Service Overview

GNI's telexREACH Solution allows you to send & receive a telex message as an internet E-Mail. You no longer need a telex machine or a PTL (private Telex Line); simply use your existing E-mail client- such as outlook Lotus cc:Mail and Notes or any internet mail package and send an e-mail to telex. GNI's telexREACH also allows you to save time & money through its many features and competitive delivery cost.

If you can send an e-mail,
you can send a telex message

How to use

There is No need to install any hardware or software on your PC. There is No need for any investment, or training, and there is No need to change anything in your current infrastructure. All you need to do is tell us which e-mail address will send telex messages, and once it is registered in our exchange, you can automatically use the service.

You have 2 ways to send a telex message. You can either address the e-mail to telex@gnitelex.com, and enter the telex number as the subject field of the e-mail; OR address the e-mail to the telexnumber@gnitelex.com (i.e. 051210510@gnitelex.com).

You then type your message into the body of the e-mail and click on send. It is automatically converted to telex and delivered to the recipient. You can also send telex messages to multiple recipients and save the telex numbers in your e-mail address book.

GNI's telexREACH allows you to receive telex messages to your e-mail account. We will assign you a UK based telex number and all telex messages sent to this number, will be forwarded to your e-mail address.

Send a telex like an e-mail

E-Mail to Telex Application

After sending the messages, you do not need to wait for a confirmation anymore. GNI's telex exchange receives the e-mail, converts into a telex and sends it to the intended recipient (s). Should the telex machine on the recipient side be busy or unavailable, GNI's telexREACH service keeps trying until it is delivered. You will then receive an e-mail delivery or non delivery confirmation.

GNI's telexREACH require no investment, changes in your structure, setup fees or minimum monthly fees. All you need to do is register your e-mail address and use the service at your convenience. You will only pay for the messages delivered.

Reports & Journals

There are 2 types of reports available. The first one is the individual delivery or non delivery notification, which you receive immediately after sending an e-mail to telex.

The other one is a scheduled daily journal, which summarizes all telex messages submitted the previous day. Both reports include the sender's e-mail address, status of delivery, date, time, duration and recipient telex number.

global network integration

About GNI

The GNI team draws from years of experience in the field of telecommunications & messaging. Our expertise is in understanding the needs of legacy & secure messaging with contemporary solutions.

As markets and technology continue to evolve, GNI is able to assist both the SME & large corporate clients overcome these

challenges.

Outsourcing has helped many companies avoid wasted investments in technology and solutions that either continue to require investment or are too costly to manage and operate.

In addition to our outsourced solutions we offer basic messaging services such as Telex & Fax at competitive rates.
